

Webmasters Report 2018

I am pleased to report that the SAM35 website has been up 99.99% of the time over the last 12 months and has continued to show that it has increasing usage across the world. This year we have fine tuned a number of pages and added some extra features for control line updates and the events calendar with the emphasis on content and consistency.

Not wishing to inflict death by powerpoint on the AGM I have kept the stats as simple as I can which you will find attached. As you can see the number of hits at the site shows an upward trend peaking at over 90,000 a month in May this year. I also attach the breakdown by the top 25 countries for the month of May to give you a global view of visitors. For the avoidance of doubt the hit rate on these graphs is the number of times a mouse click is made navigating around our site.

As always please send me your suggestions and ideas so that the site continues to reflect the requirements of the membership.

Thanks for all the support from the membership and the committee.
